How do I get Solidworks Student Design Kit?

The Solidworks Student Design Kit (SDK) can be found on the Mechanical Engineering software page. Once downloaded you will need to register with Solidworks for the activation code.

**System Requirements:**

You must be running a 64bit version of Microsoft Window. For more information please see Solidworks site. [https://www.solidworks.com/sw/support/SystemRequirements.html](https://www.solidworks.com/sw/support/SystemRequirements.html)

**Online Support:**

Solidworks does not provide support for the Student Design Kit. The only support available for it is through their online forums. [http://www.solidworks.com/goedu](http://www.solidworks.com/goedu) or [https://forum.solidworks.com/](https://forum.solidworks.com/)

**Installation instructions:**

[https://www.solidworks.com/sw/education/6439_ENU_HTML.htm](https://www.solidworks.com/sw/education/6439_ENU_HTML.htm)

Q: What limits does the Student Kit have?
A: This product may only be used by Students and Educators at these institutions on their own computers for purposes such as completing homework assignments, student projects and building your design skills using SOLIDWORKS software. There is also a watermark. Watermarks appearing in published research will result in a bill sent to you from Solidworks.
