Unable to log into GitHub

Problem
You tried to log onto https://github.ucsb.edu and your credentials don’t work

Solution

https://github.ucsb.edu only accepts the College of Engineering Account Credentials.

If you are not affiliated with the College of Engineering as outlined at Can I use GitHub on github.ucsb.edu?, you will not be able to access GitHub Enterprise on https://github.ucsb.edu

The most common mistake we have seen is people using the wrong credentials on https://github.ucsb.edu.

You should be using your College of Engineering Account Username and password.

Example

If your College of Engineering account is jdoe, the username would be jdoe and the password would be your College of Engineering Account’s password.

If you are unsure what your College of Engineering Password is, you can reset it at https://accounts.engr.ucsb.edu/maintain/forgot_password for your account.
